

Puppet-Using
Systems Administrator

```
graph TD; A([Puppet-Using Systems Administrator]) --> B[git push]; B --> C[Gitea server]; C --> D[gitea_webhook]; D --> E[webhook_service]; E --> F[r10k_deploy]; F --> G[deployed_environment];
```

The diagram is a vertical flowchart illustrating a deployment workflow. It begins with an oval node at the top labeled 'Puppet-Using Systems Administrator'. A downward arrow connects this to a purple rectangular node labeled 'git push'. Another downward arrow leads to a green rectangular node labeled 'Gitea server'. This is followed by a purple rectangular node labeled 'gitea_webhook', then another purple rectangular node labeled 'webhook_service', then a purple rectangular node labeled 'r10k_deploy', and finally a purple rectangular node at the bottom labeled 'deployed_environment'. All nodes are connected by downward-pointing arrows, indicating a sequential process.

git push

Gitea server

gitea_webhook

webhook_service

r10k_deploy

deployed_environment
